

**flexiK**

Light by Desire

1800K - 6500K

White light at desired colour temperatures can now be easily attained. ELR's flexiK LED modules are designed to be pre-set at any colour temperature by increments of 100K within the range of very warm white 1800K up to very cool white 6500K. Immense ambiances can now be achieved with the desired white light.
